SPEAKERS AND TOPICS

CROPS

- Dr Jonathan Lundgren (American speaker)
– These things shifted my thinking the most
- Dr Hendrik Smith – The latest conservation agriculture research results and adoption rates in South Africa
- Mr Danie Bester – Regenerative farming and the latest precision technology
- Prof Erik Holm – How to think about change
- Dr Gerhard du Preez – How to farm in partnership with nature, and some of the latest on-farm research methods and results on soil health
- Prof James Blignaut – Regenerative farming – a mere buzzword or a sound financial consideration?

CATTLE

- Mr Loran Steinlage (American speaker)
– How I am making regenerative farming work for me – from equipment to practises
- Mr DF Fyfer – Regenerative stacking in the arid Kalahari (cattle, ultra-high density grazing, chickens and bees)
- Mr Frits van Oudtshoorn – How successful is ultra-high density grazing? The latest scientific results according to research on the farm of mr Danie Slabbert of Reitz
- Mr Johan Boucher – Regenerative grazing with game
- Mr Hannes Botha – How regenerative farming has made me enjoy farming again
