Beraamde Lewering vs NOK Skatting / Delivery Estimate vs CEC Estimate 2026/27 Marketing year

	White/Wit	Yellow/Geel	Total/Totaal	
Early deliveries (Mar & Apr) (tons) (Note 1)	339 176	426 369	765 545	Vroeë lewerings (Mrt & Apr) (tonne) (Nota 1)
Deliveries (May-Feb) (tons) (Note 2)	8 556 308	6 377 140	14 933 448	Lewerings (Mei-Febr) (tonne) (Nota 2)
Total deliveries (tons) (Note 3)	8 895 484	6 803 509	15 698 993	Totale lewerings (tonne) (Nota 3)
CEC production estimate (tons)	9 487 790	7 914 050	17 401 840	NOK produksieskatting (ton)
Adjustment for on-farm consumption & storage (tons) (Note: 4) (Retention)	195 000	440 000	635 000	Aanpassing vir op-plaas verbruik en stoor (Terughoudings)
Crop estimate MINUS farm consumption, storage, seed retention etc	9 292 790	7 474 050	16 766 840	Produksieskatting MIN plaasverbruik, stoor, saad terughoudings ens
Deliveries as % of CEC estimate minus retentions (%)	96%	91%	94%	Lewerings as % van die NOK skatting minus terughoudings(%)
Outstanding after adjustment (tons)	397 306	670 541	1 067 847	Uitstaande op NOK na aanpassings (tonne)
Remaining weeks for delivery (Note 5)	31	31	31	Uitstaande weke vir lewering (Nota 5)
Delivery tempo needed to obtain CEC estimate	12 816	21 630	33 370	Lewerings tempo benodig
Previous 3-year average deliveries	6 677 893	6 097 880	12 775 773	Afgelope 3 jaar gemiddelde lewerings
Previous 5-year average deliveries	6 939 321	6 237 503	13 176 824	Afgelope 5 jaar gemiddelde lewerings

Notas/Notes

Nota 1: Maart en April 2024 se lewerings word geneem as vroeë lewerings. Ouseisoenlewerings is moontlik maar waarskynlik minimaal

Nota 2: Slegs lewerings vanaf Mei tot Feb word in ag geneem omdat 'n aanname vir Maart en April se vroeë lewerings reeds gemaak is

Nota 3: Totale lewerings tot datum in 52 weke periode (Let op: Periode geneem as Mar - Feb en nie volgens amptelike bemarkingsjaar, Mei - Apr)

Nota 4: Aanname: Volgens NOK se opnamesyfer onder produsente einde van Nov elke jaar - sien ook Graan SA se vraag- en aanbodbalansstaat.

Nota 5: [52 weke minus (Aantal vroeë lewerings weke plus weke sedert Meimaand)]

White maize:

- ❑ In week 21 of the 2026/27 marketing season, a total of **8,56 million tons** were delivered for the week ending 18th of September 2026, accounting for **96%** of the 7th CEC's adjusted production estimate of 9,5 million tons.
- ❑ This means that **397 306 tons** still need to be delivered over the remaining 31 weeks of the season, requiring average weekly deliveries of **12 816 tons**.
- ❑ Deliveries were **1,14 million tons** higher than the same period last season, and **1,62 million tons** above the 5-year average.
- ❑ Week-on-week deliveries increased by **6 298 tons** from week 20.

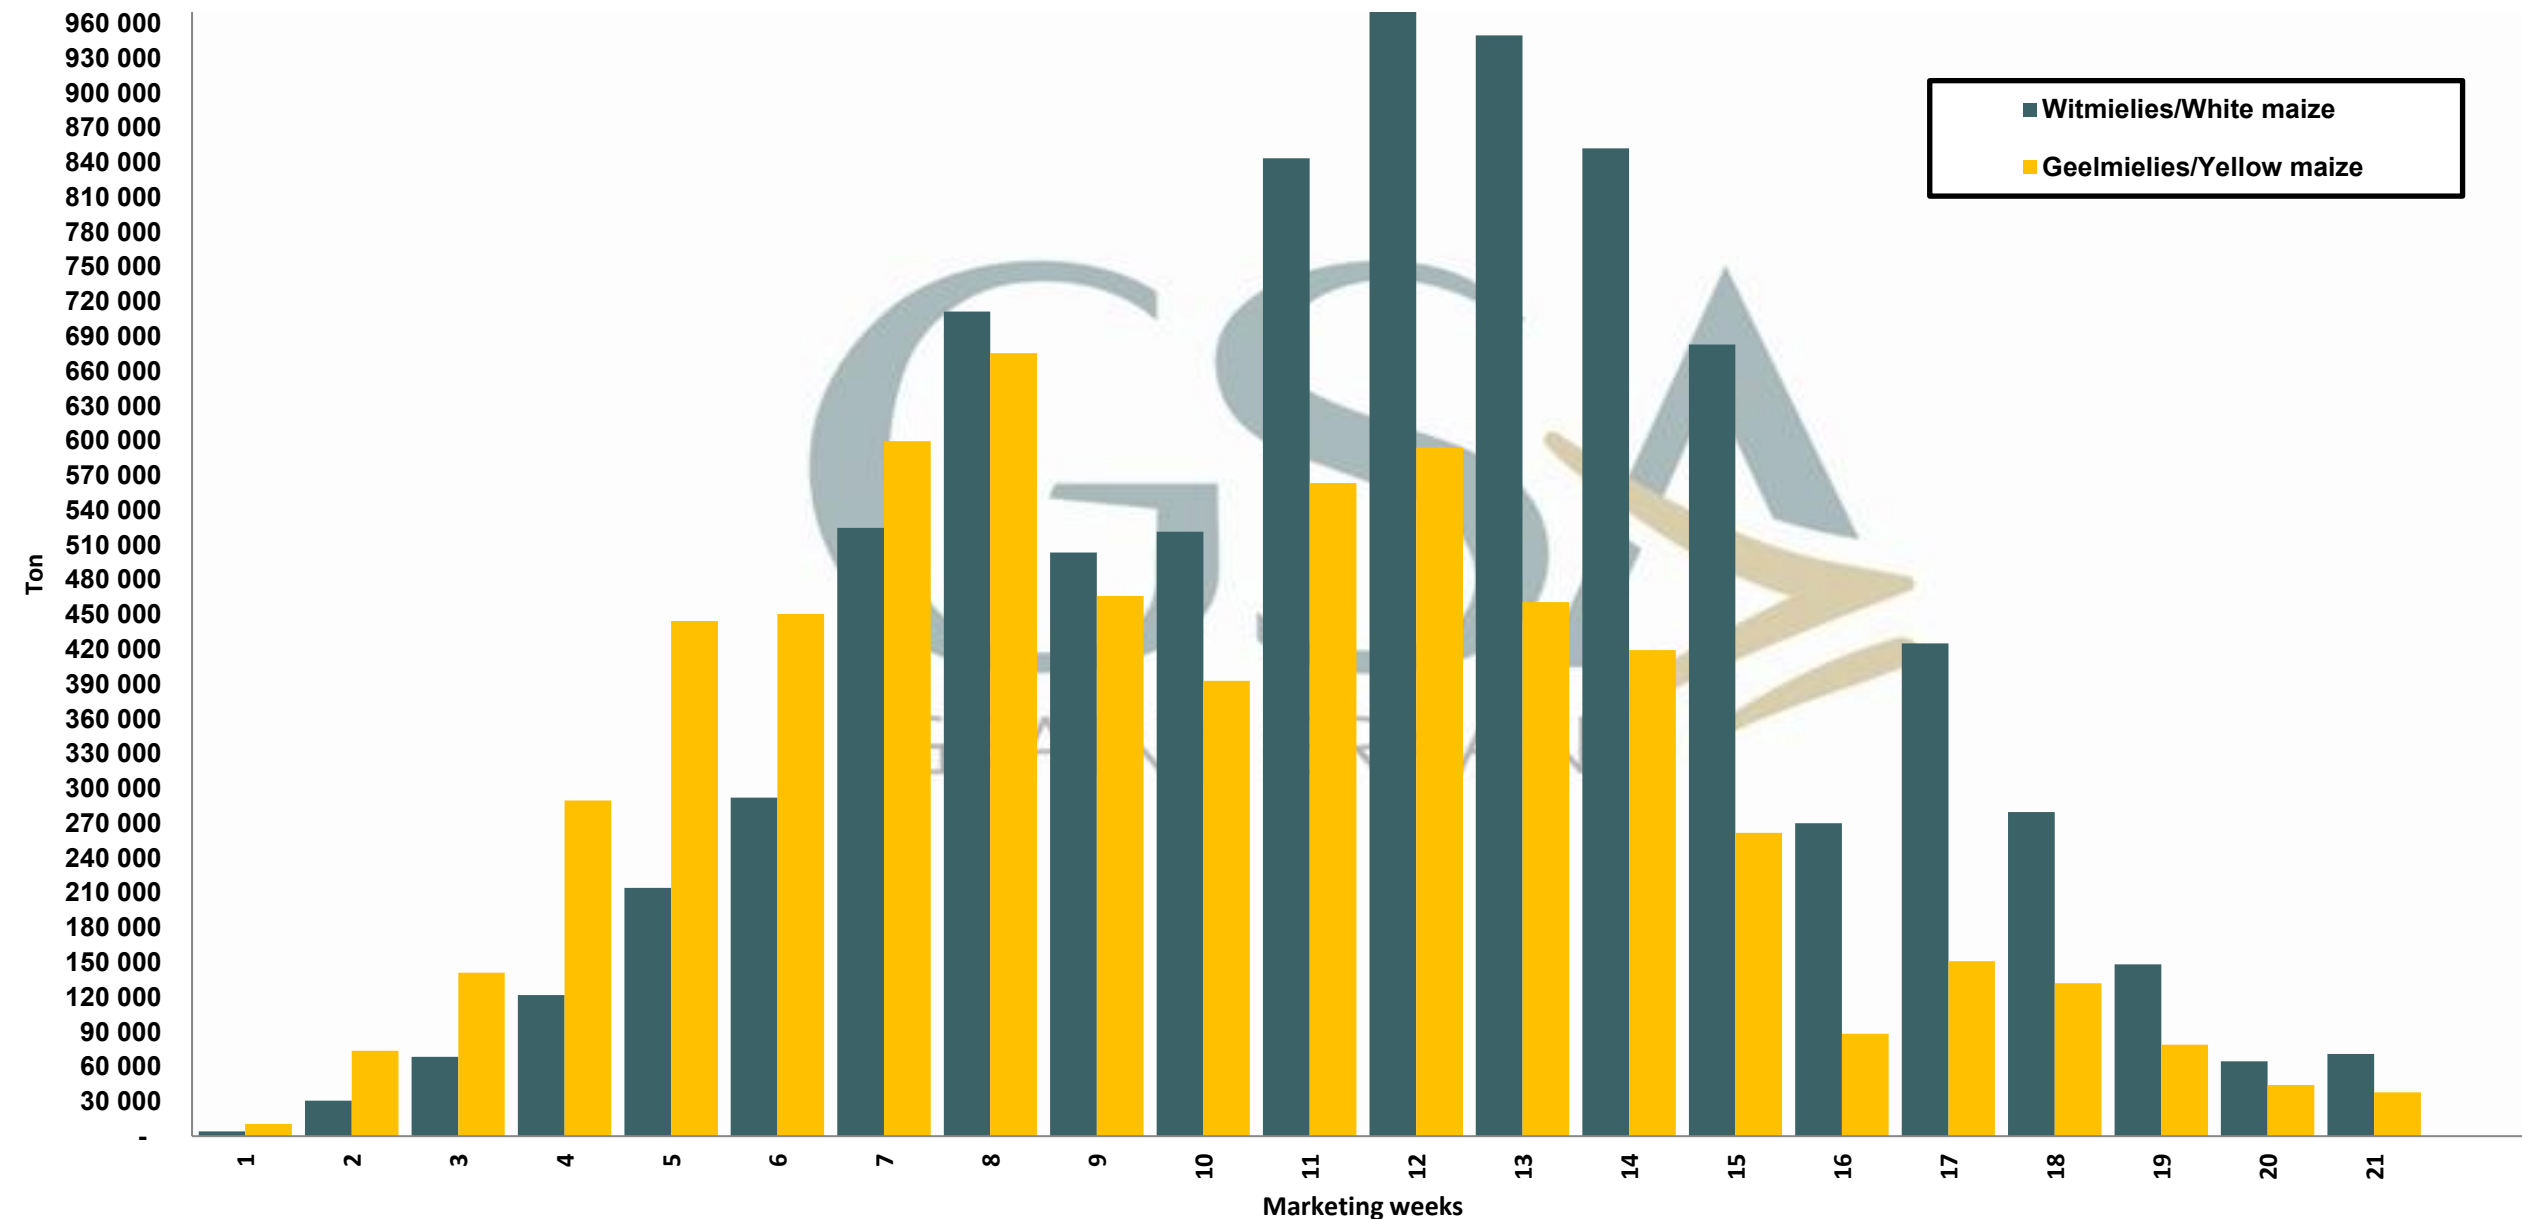

Yellow maize:

- ❑ In week 21 of the 2026/27 marketing season, a total of **6,38 million tons** were delivered for the week ending 18th of September 2026, representing **91%** of the 7th CEC's adjusted production estimate of 7,91 million tons.
- ❑ This leaves **670 541 tons** to be delivered over the remaining 31 weeks, requiring average weekly deliveries of **21 630 tons**.
- ❑ Deliveries were **361 560 tons** lower than the same period last season, and **139 637 tons** above the 5-year average.
- ❑ Week-on-week deliveries decreased by **6 472 tons** from week 20.

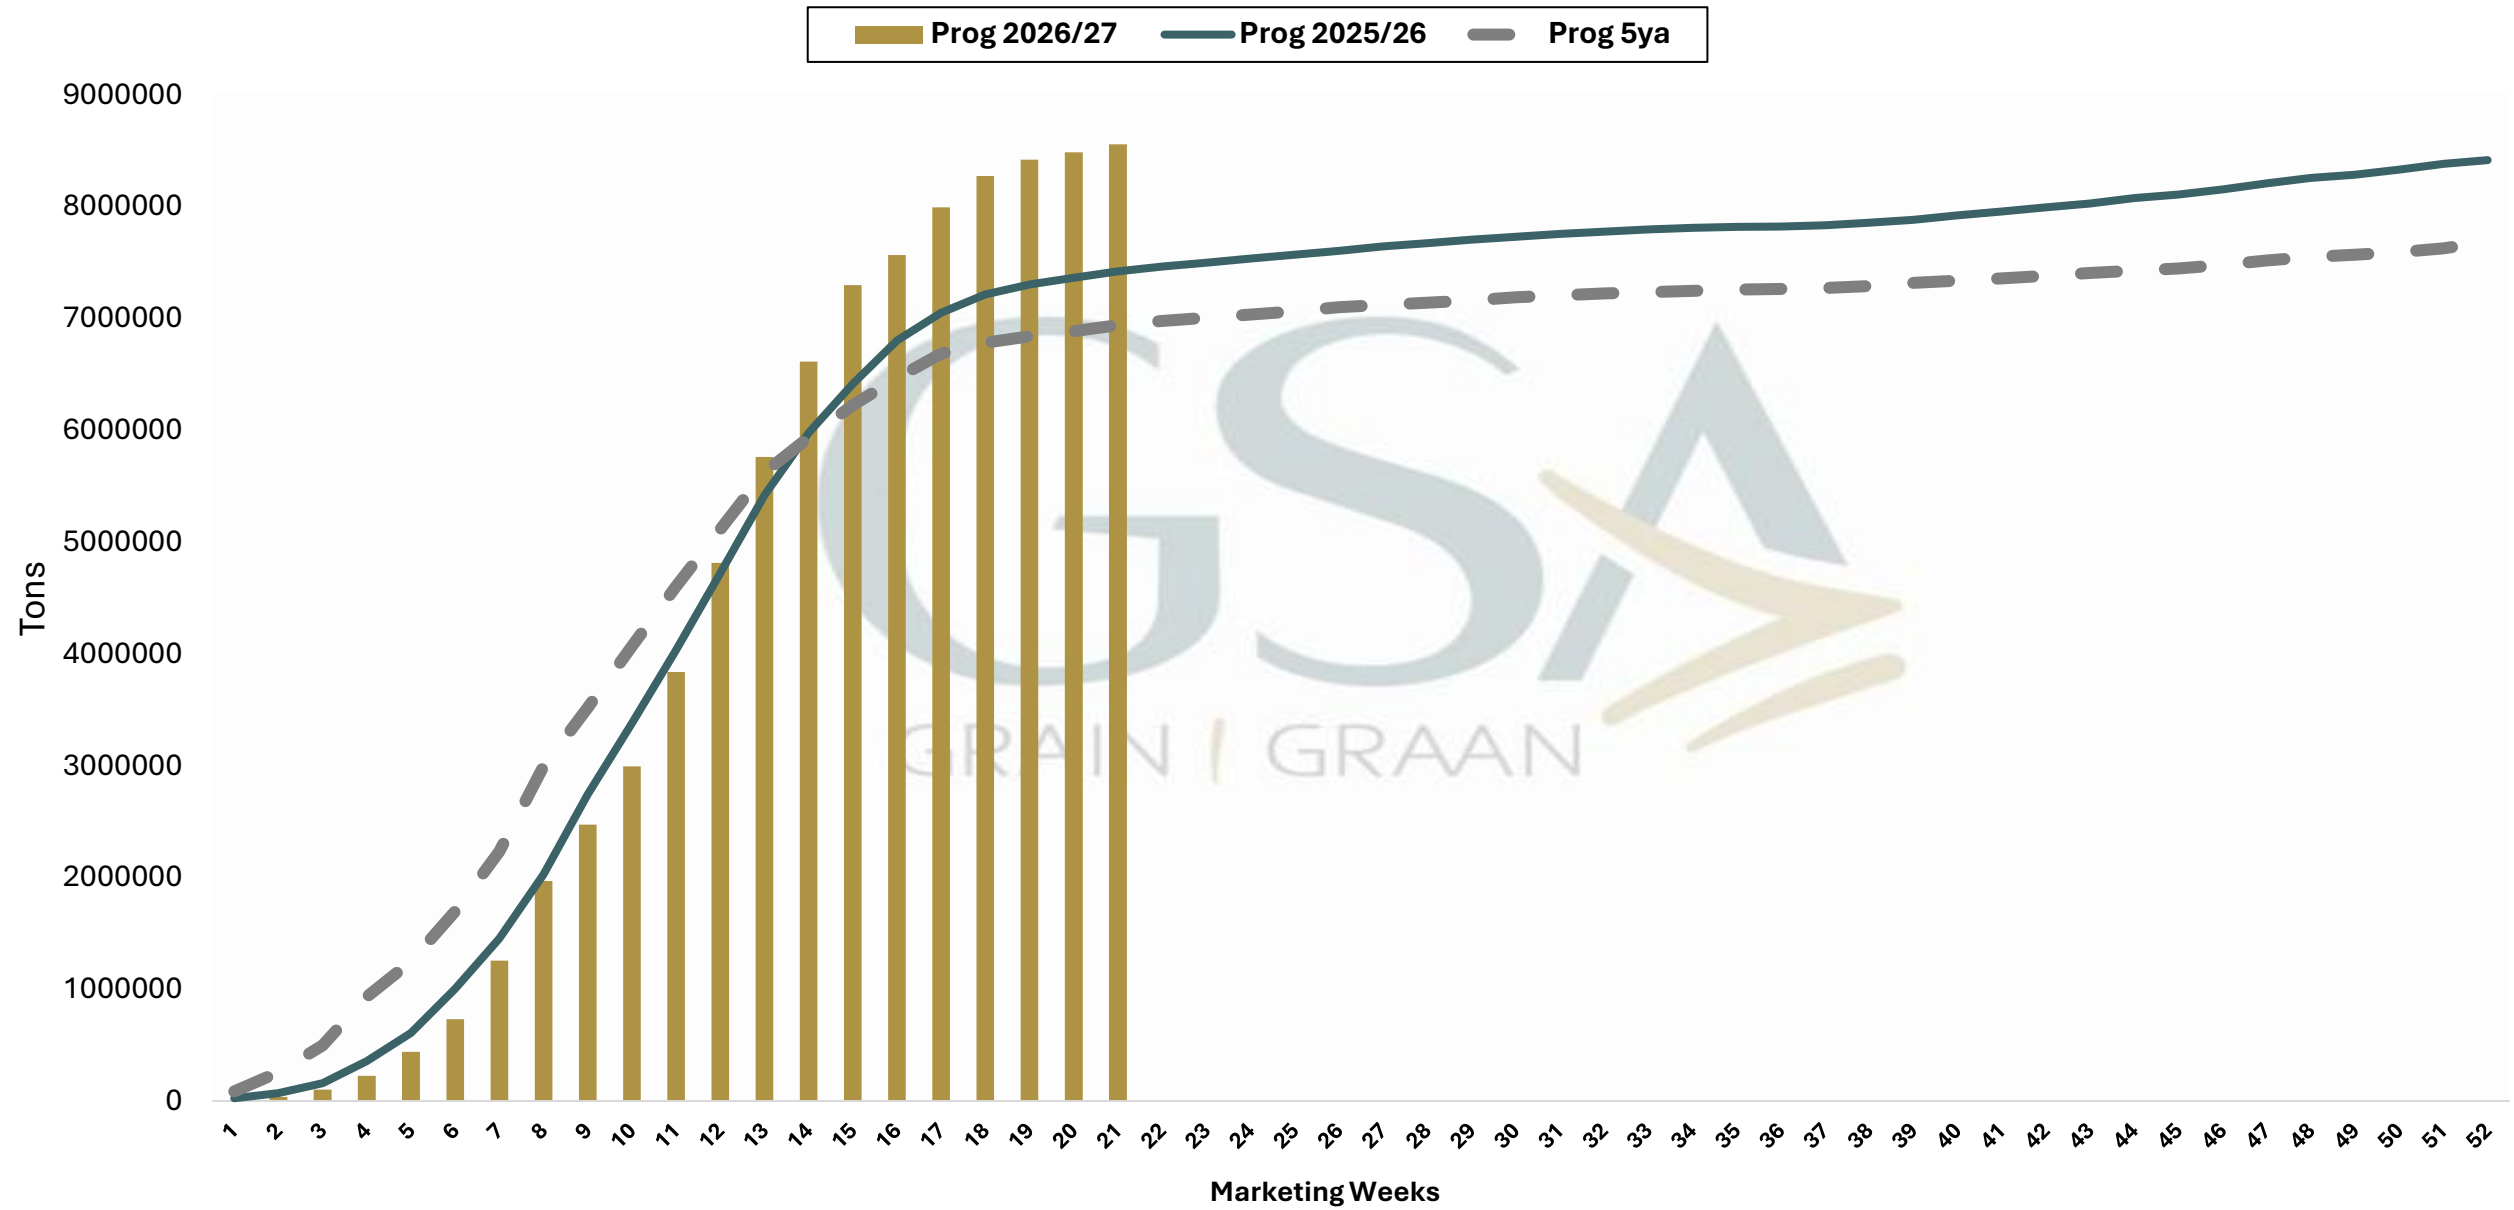

The Crop Estimates Committee has forecast more white maize production this season, and this trend can be seen in the white maize deliveries, which have exceeded the volumes of yellow maize delivered since week 8 and are currently above the 5-year average and the deliveries made during the same time last season.

Note: *Outstanding deliveries of white maize and yellow maize take into account early deliveries, on-farm consumption, storage, seed retention, and other non-commercial uses.*

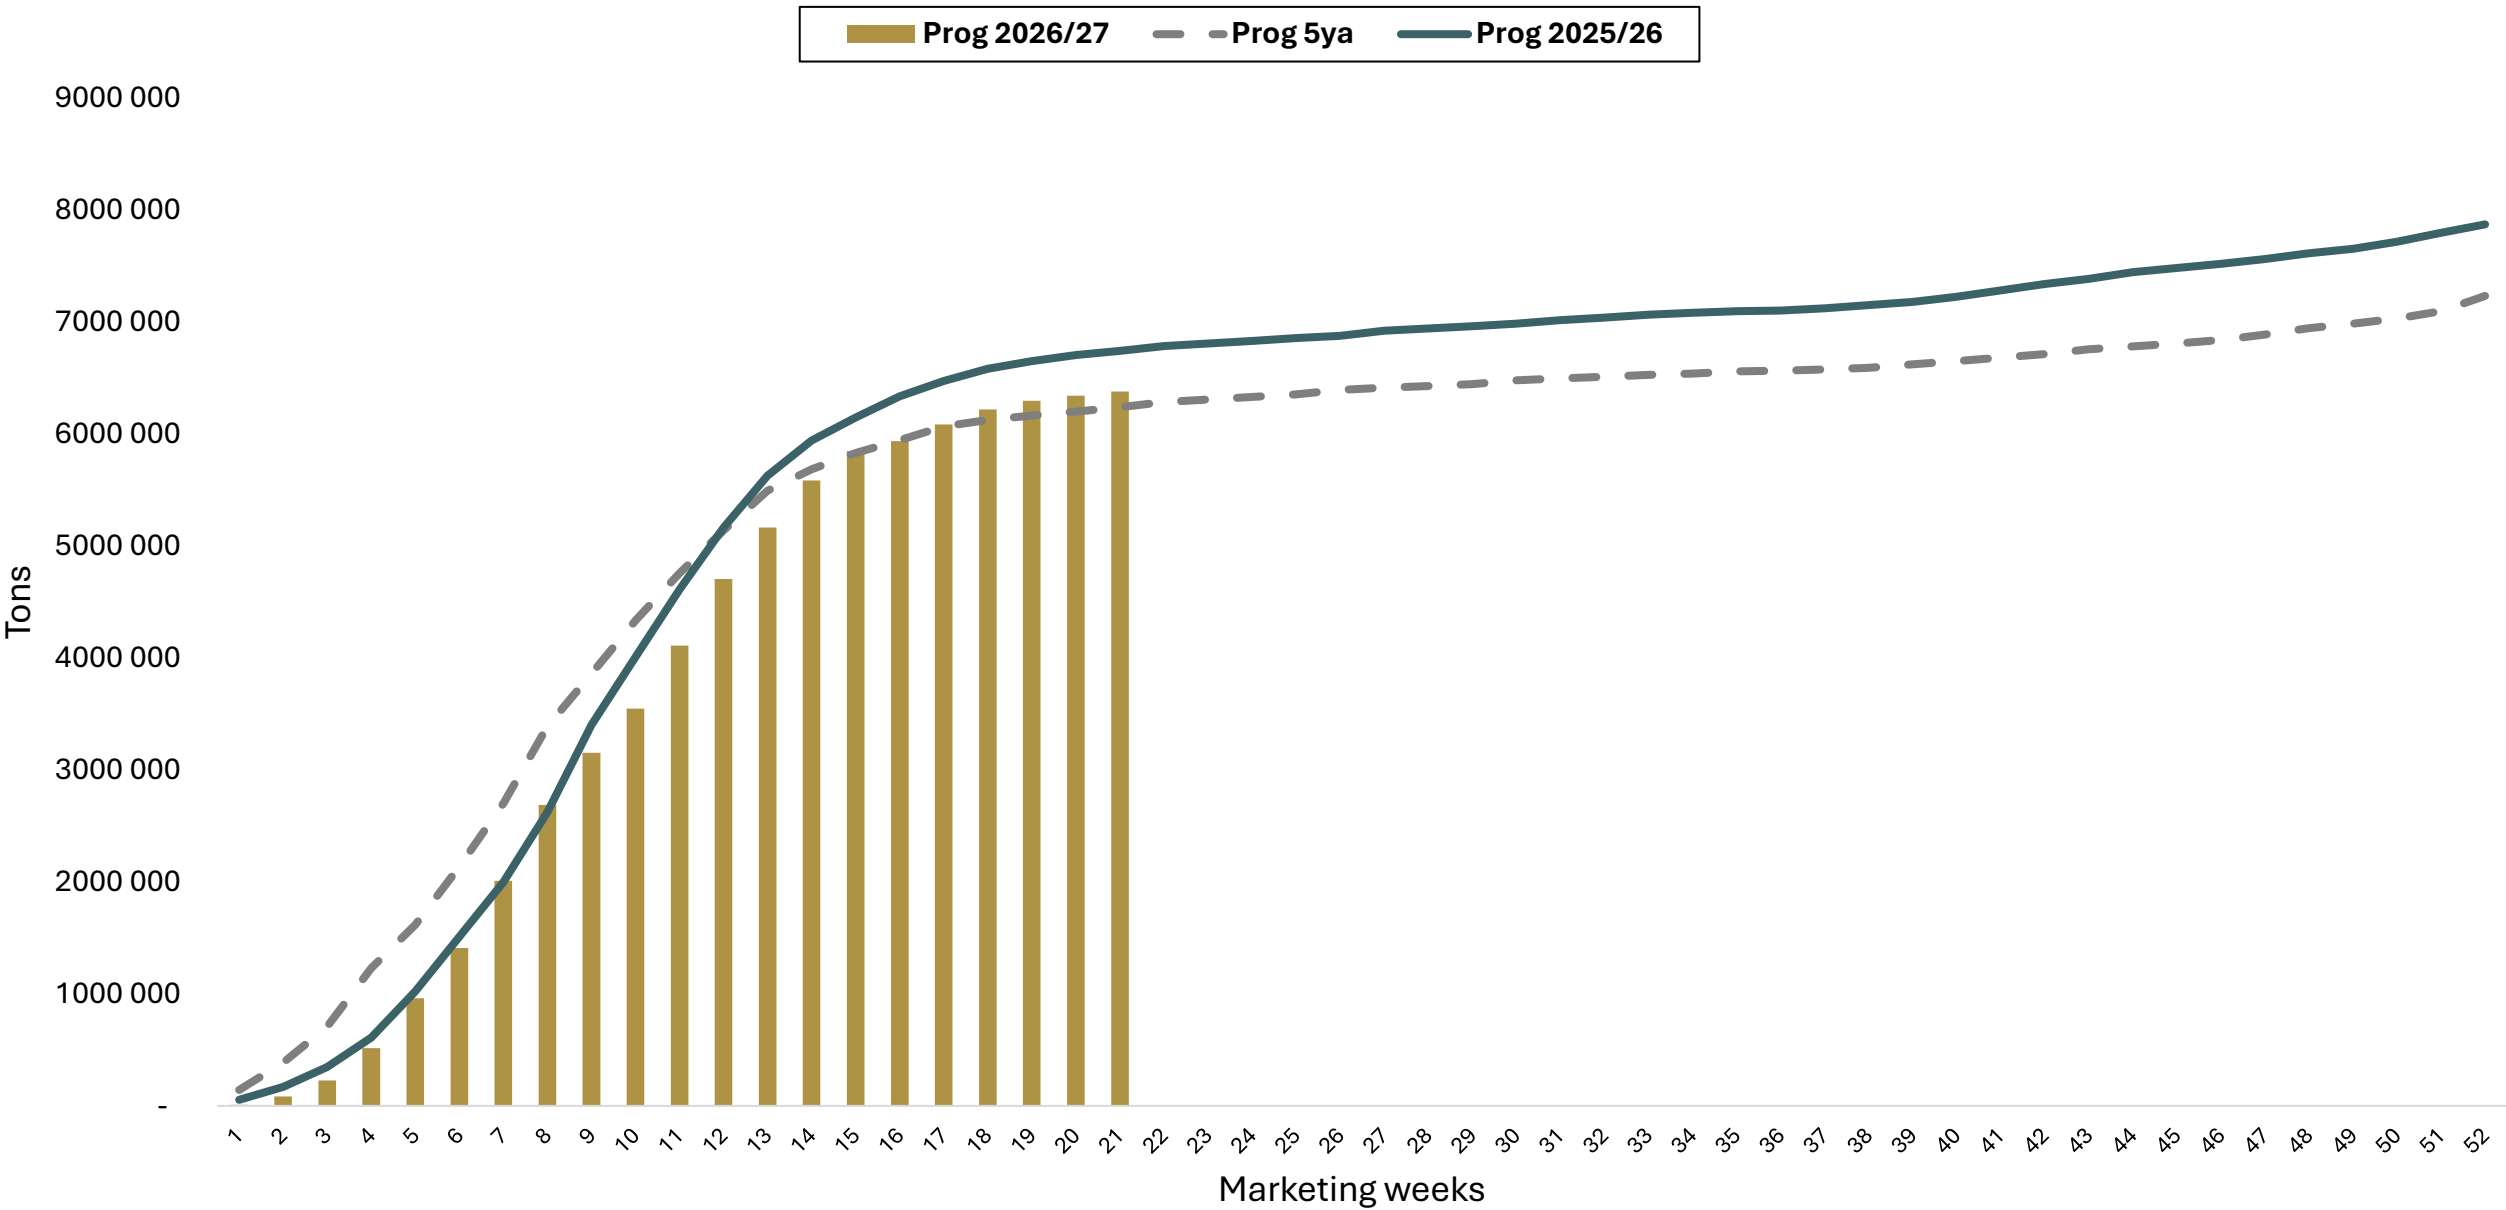

WEEKLY MAIZE DELIVERIES (2026/27 MARKETING SEASON: 25 APRIL TO 21 AUGUST 2026)

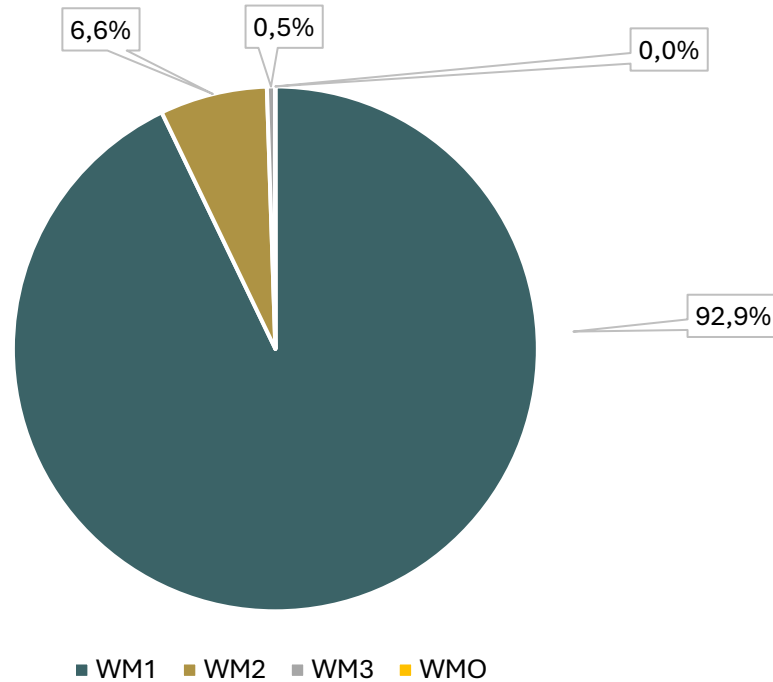

WHITE MAIZE DELIVERY TRENDS

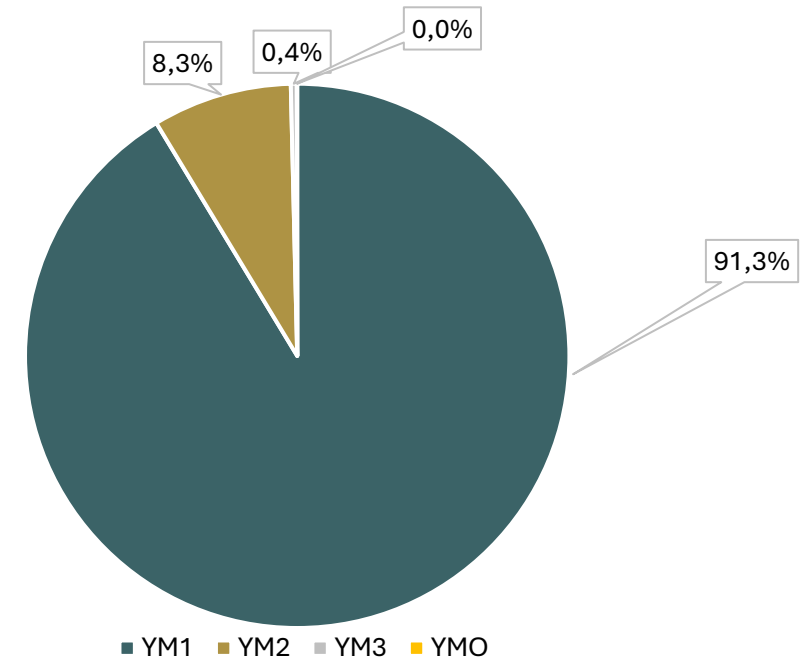

YELLOW MAIZE DELIVERIES TRENDS

White Maize Grading 2026/04/25 - 2026/09/18

Yellow Maize Grading 2026/04/25 - 2026/09/18

- ❑ Between the 25th of April and the 18th of September 2026, producer deliveries amounted to **8,6 million tons of white maize** and **6,43 million tons of yellow maize**.
- ❑ Weekly grading information shows that the majority of deliveries met high-quality grade, with **7,9 million tons of WM1** and **5,8 million tons of YM1**.
 - ❖ For white maize, 92.9% was classified as Grade 1 (unchanged from week 20), with a further 6.6% in Grade 2.
 - ❖ Similarly, yellow maize was classified as 91.3% Grade 1 (unchanged from week 20) and 8.3% Grade 2.

MAIZE GRADES PER MARKETING SEASON

The tables below show the maize grades for the previous 4 marketing seasons

2025/26 White maize		2025/26 Yellow maize	
WM1	64,16%	YM1	86,88%
WM2	27,95%	YM2	12,37%
WM3	7,70%	YM3	0,57%
WMO	0,19%	YMO	0,18%

2024/25 White maize		2024/25 Yellow maize	
WM1	97,46%	YM1	89,18%
WM2	2,34%	YM2	10,42%
WM3	0,19%	YM3	0,35%
WMO	0,01%	YMO	0,05%

2023/24 White maize		2023/24 Yellow maize	
WM1	96,05%	YM1	97,17%
WM2	3,58%	YM2	2,75%
WM3	0,32%	YM3	0,05%
WMO	0,04%	YMO	0,03%

2022/23 White maize		2022/23 Yellow maize	
WM1	72,89%	YM1	92,29%
WM2	22,60%	YM2	7,15%
WM3	4,47%	YM3	0,42%
WMO	0,04%	YMO	0,14%

Beraamde lewering vs NOK skatting / Delivery Estimate vs CEC Estimate

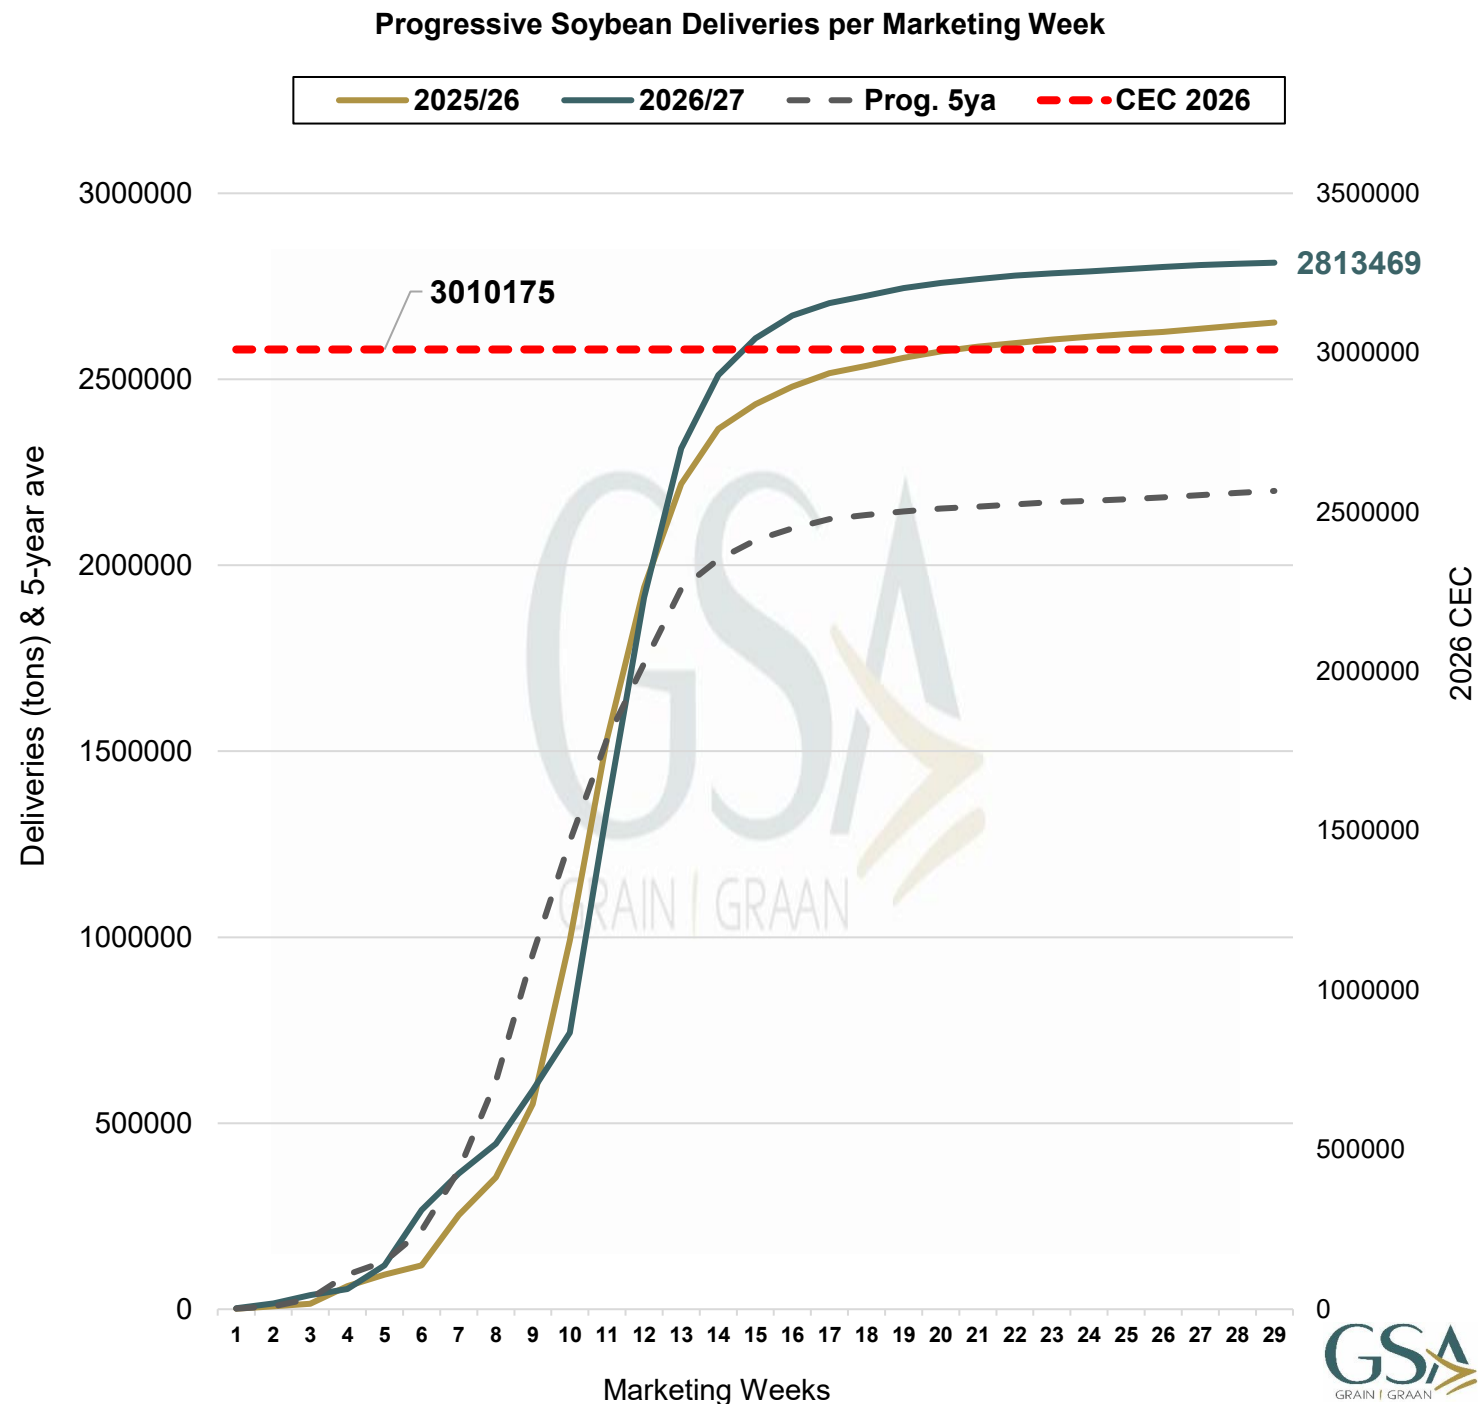

2026/27 bemarkingsjaar/ marketing year

	Sojabone /Soybeans	
Total deliveries (tons)	2 813 469	Totale lewerings (tonne)
CEC production estimate (tons)	3 010 175	NOK produksieskatting (ton)
Adjustment for on farm consumption & storage (tons)		Aanpassing vir plaasverbruik & stoor (tonne)
Adjustment for seed retention	45 000	Aanpassing vir saad terughouding
Crop estimate MINUS farm consumption, storage, seed retention etc	2 965 175	Produksieskatting MIN plaasverbruik, stoor, saad terughouding ens
Deliveries as % of CEC estimate minus retensions (%)	94,9%	Lewerings as % van die NOK skatting minus terughoudings(%)
Outstanding after adjustment (tons)	151 706	Uitstaande op NOK na aanpassings (tonne)
Remaining weeks for delivery	23	Uitstaande weke vir lewering
Positive outstanding means a CEC over estimate		Positief uitstaande beteken 'n NOK oorskatting
Delivery tempo needed to obtain CEC estimate	6 596	Lewerings tempo benodig
Previous 3-year average deliveries	2 348 771	Afgelope 3 jaar gemiddelde lewerings
Previous 5-year average deliveries	2 199 868	Afgelope 5 jaar gemiddelde lewerings

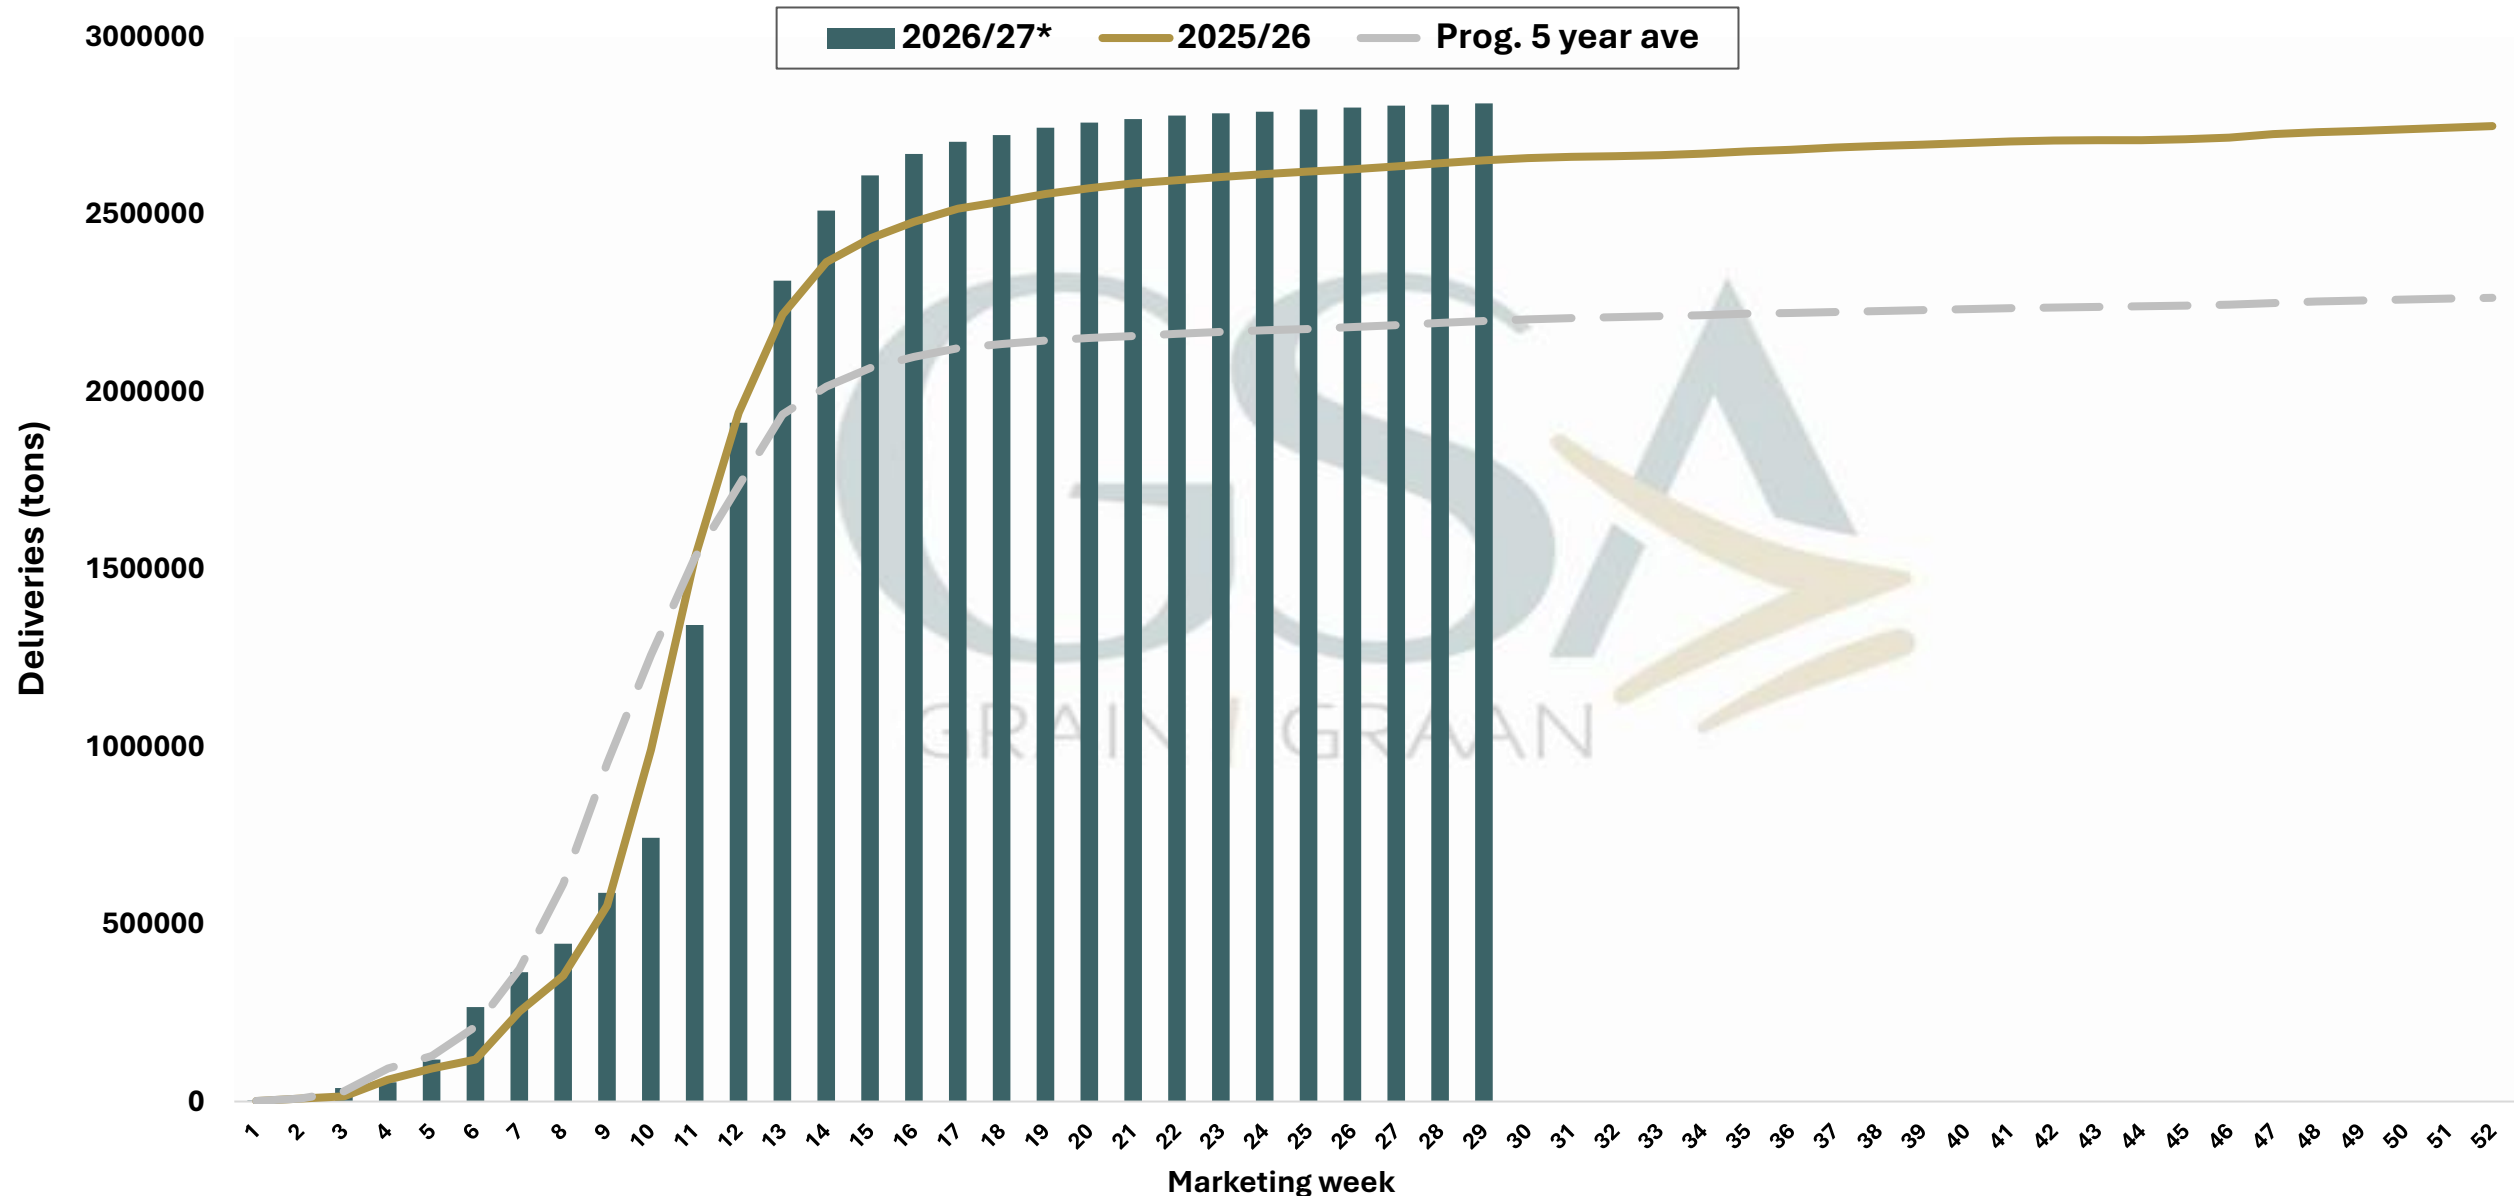

- ❑ As of week 29 of the 2026/27 marketing season, soybean deliveries have reached **2,8 million tons**, representing **94,9%** of the adjusted 7th CEC production estimate of **3,01 million tons**.
- ❑ This adjusted estimate accounts for seed retention of **45 000 tons**, with no additional volumes allocated to on-farm consumption or storage.
- ❑ However, to meet the full adjusted CEC estimate, a remaining **151 706 tons** must still be delivered over the next 23 weeks.
- ❑ This implies a required average weekly delivery rate of approximately **6 596 tons** for the remainder of the marketing season.

SOYBEANS

- By week 29 of the 2026/27 marketing season, cumulative commercial soybean deliveries have reached **2.8 million tons**, following **3 221 tons** of soybeans being delivered in the week ending 18th of September 2026.
- Week-on-week deliveries decreased from the previous week by **116 tons**.
- Weekly deliveries have decreased below **10 000 tons** from week 23, indicating that weekly deliveries are slowing down.
- Weekly producer deliveries are currently **613 601 tons** above the *progressive five-year average* and **160 843 tons** higher than the same period last season.

PROGRESSIVE SEASONAL DELIVERY TRENDS

Beraamde lewering vs NOK skatting / Delivery Estimate vs CEC Estimate

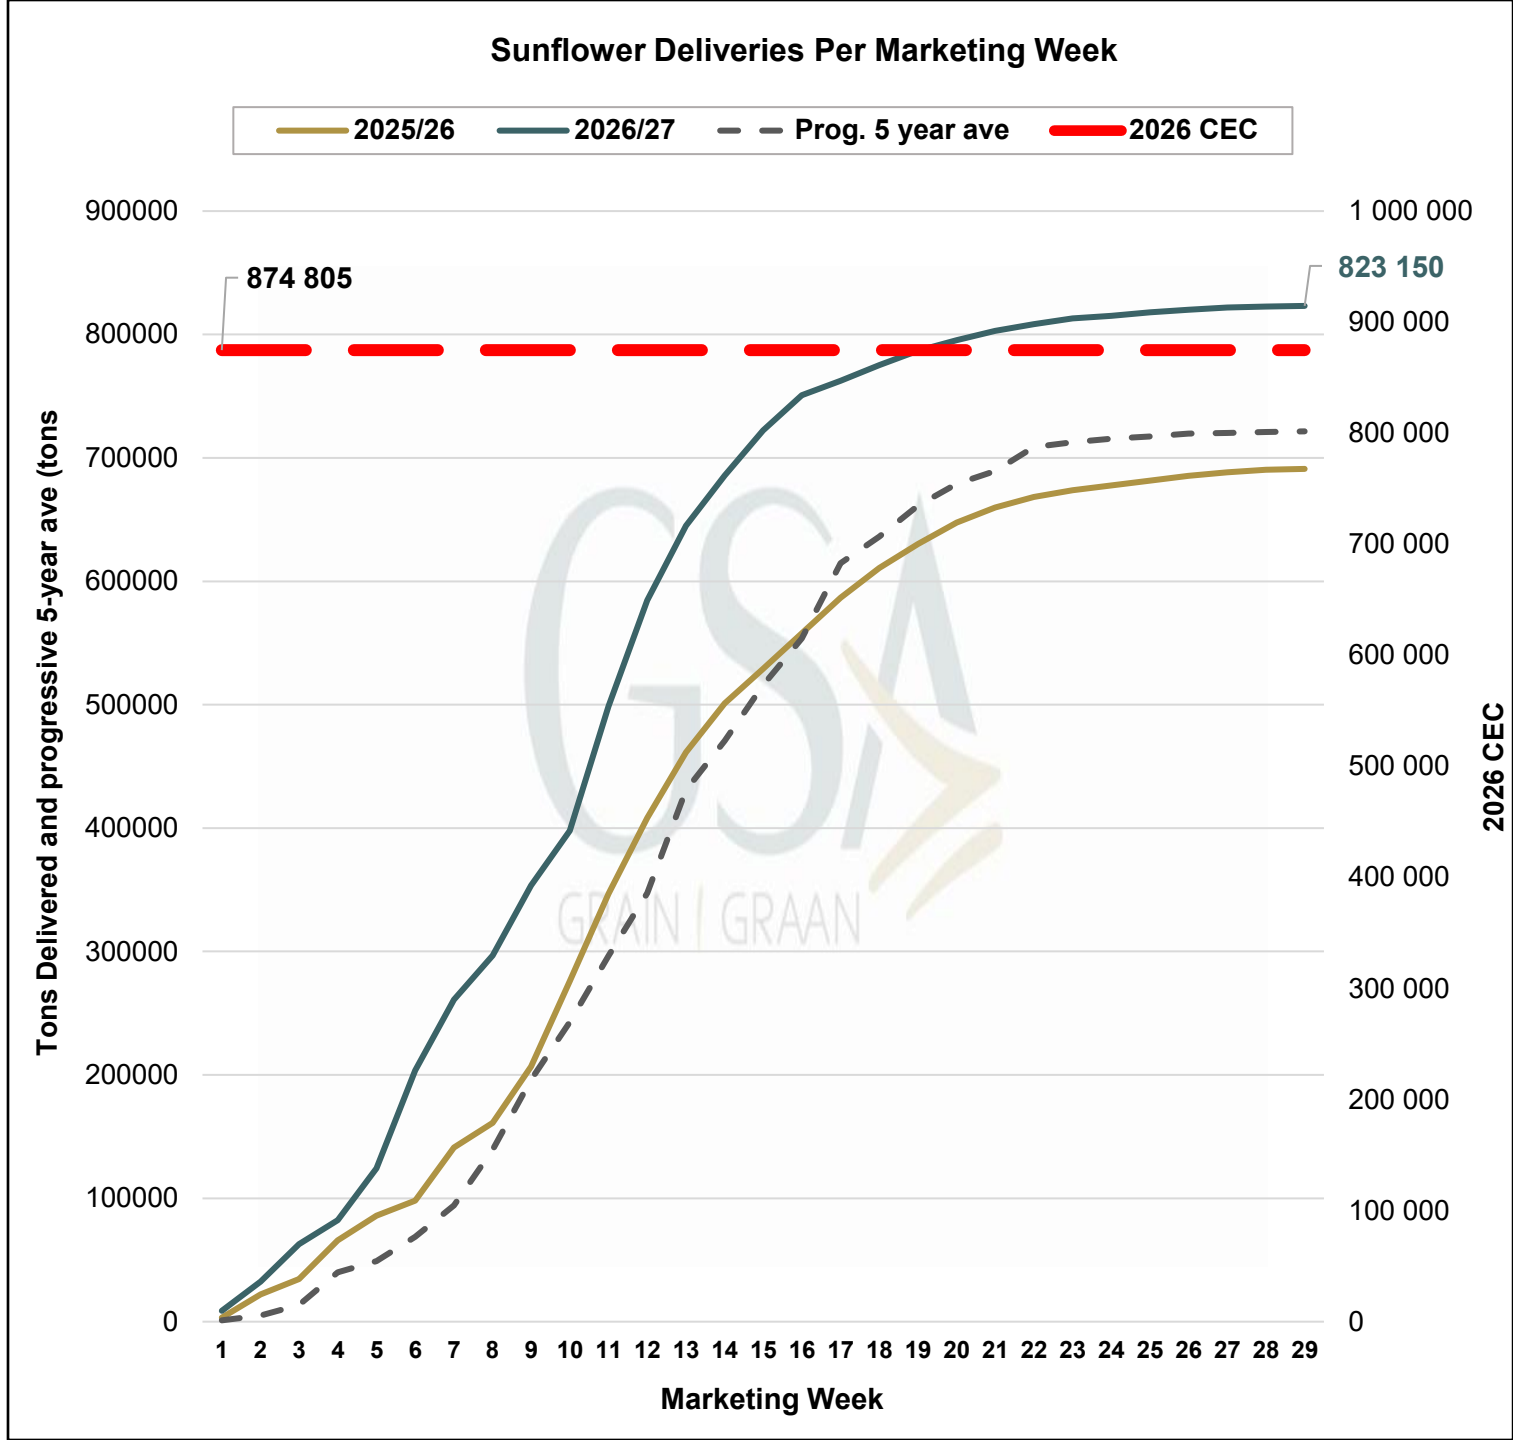

2026/27 bemarkingsjaar

	Sonneblom / Sunflower	
Total deliveries (tons)	823 150	Totale lewerings (tonne)
CEC production estimate (tons)	874 805	NOK produksieskatting (ton)
Adjustment for on farm consumption & storage (tons)	-	
Adjustment for seed retention	-	Aanpassing vir saad terughouding
Crop estimate MINUS farm consumption, storage, seed retention etc	874 805	Produksieskatting MIN plaasverbruik, stoor, saad terughouding ens
Deliveries as % of CEC estimate minus retentions (%)	94%	Lewerings as % van die NOK skatting minus terughoudings(%)
Outstanding after adjustment (tons)	51 655	Uitstaande op NOK na aanpassings (tonne)
Remaining weeks for delivery	23	Uitstaande weke vir lewering
Delivery tempo needed to obtain CEC estimate	2 246	Lewerings tempo benodig
Previous 3-year average deliveries	673 893	Afgelope 3 jaar gemiddelde lewerings
Previous 5-year average deliveries	721 503	Afgelope 5 jaar gemiddelde lewerings

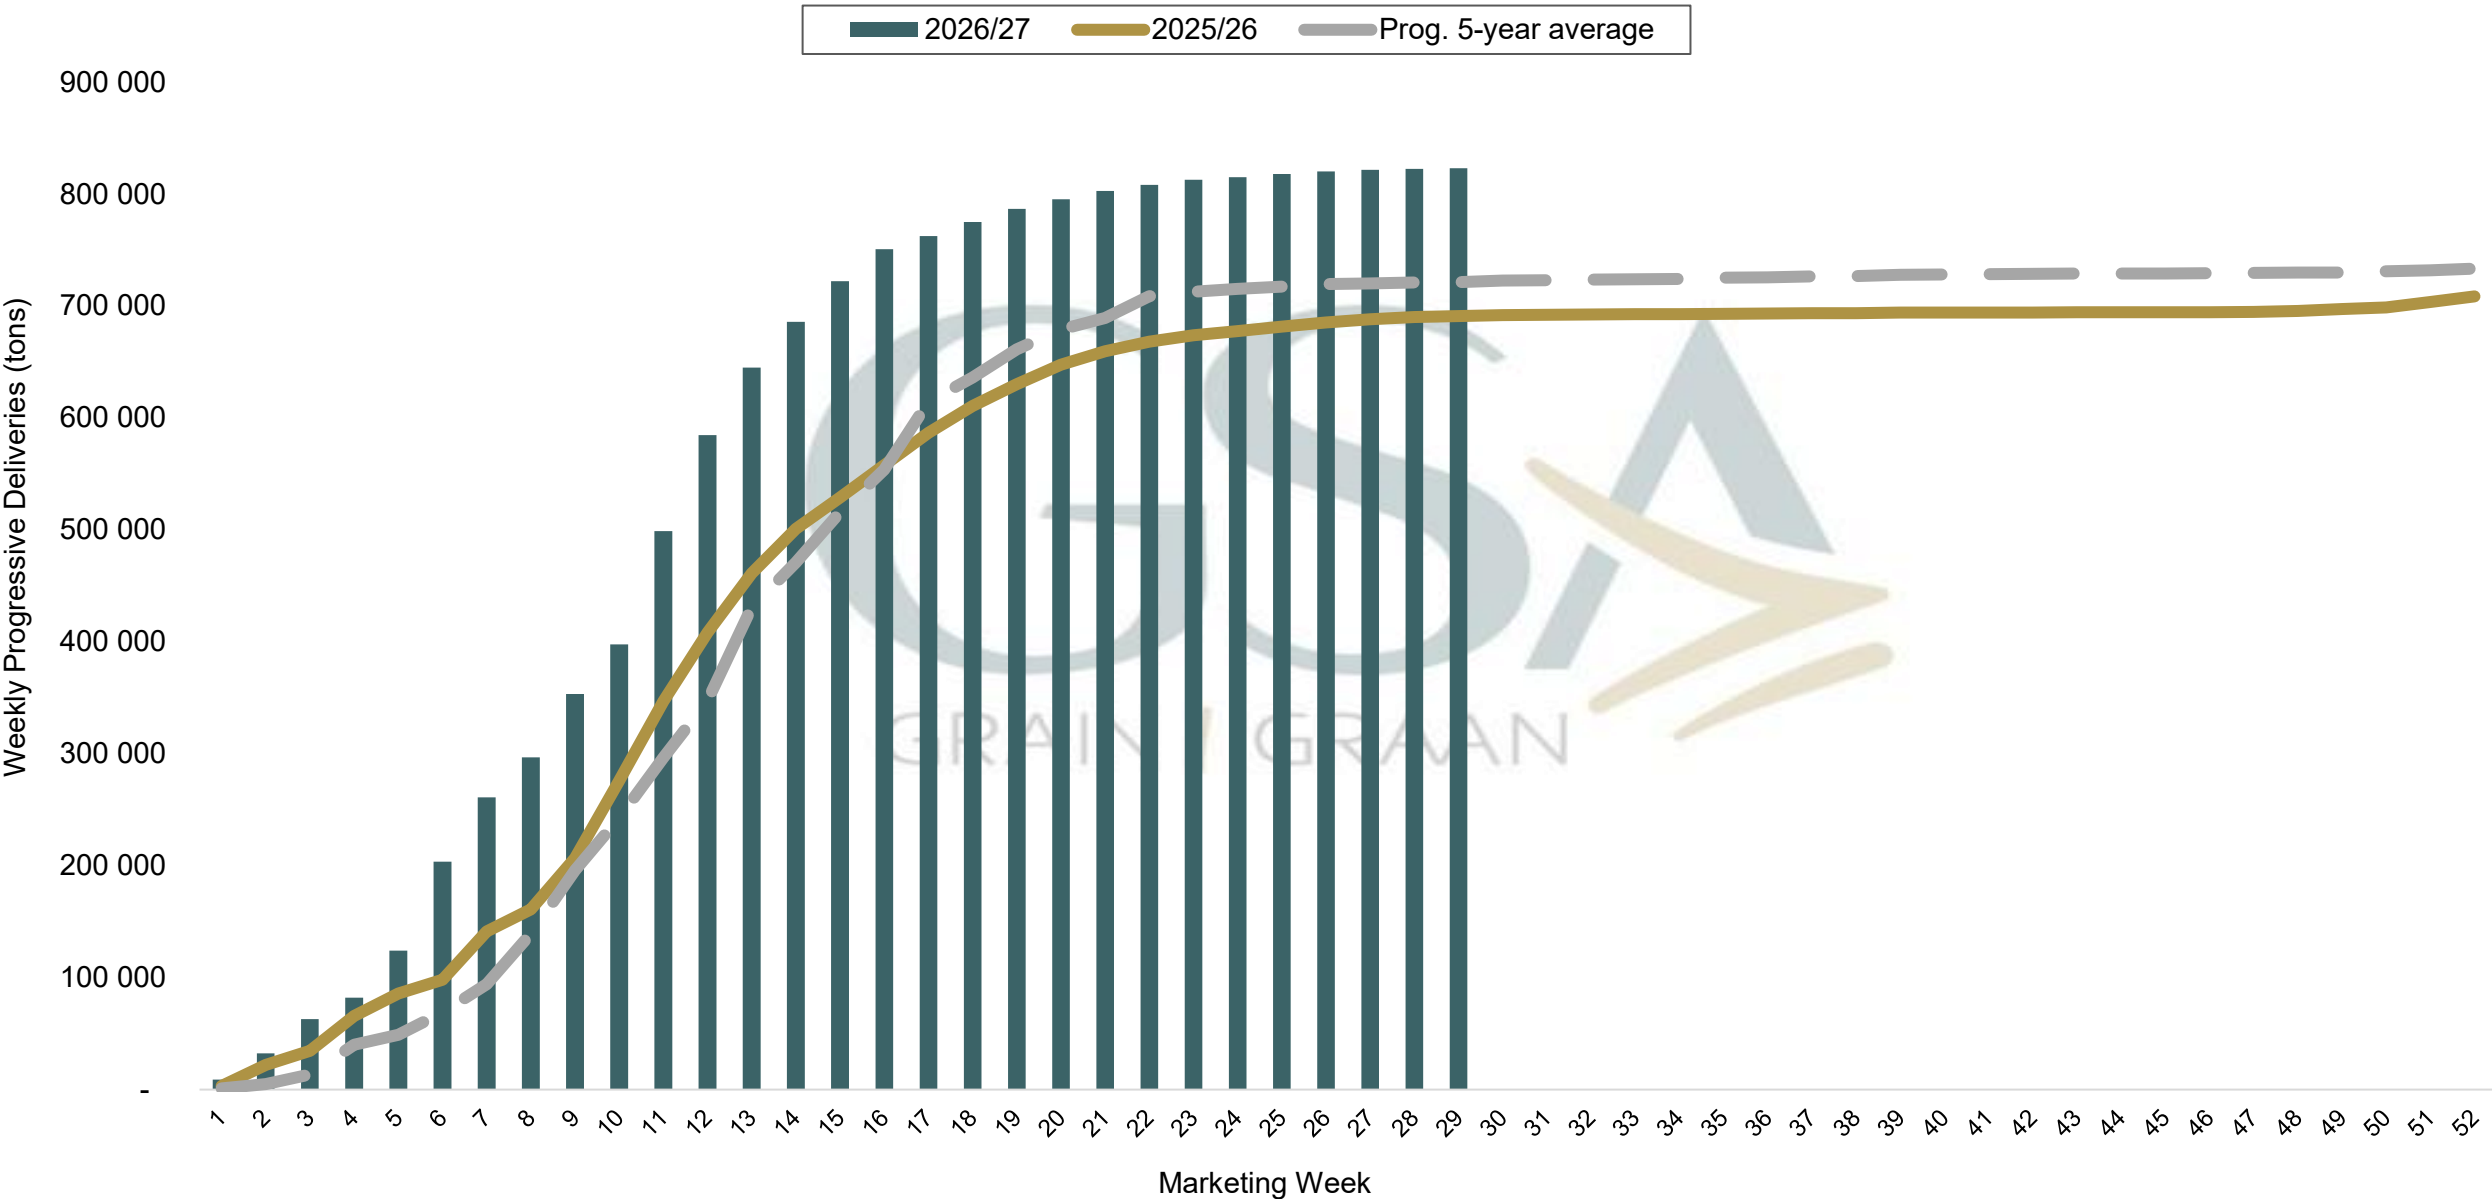

- As of week 29 of the 2026/27 marketing season, sunflower deliveries have reached **823 150 tons**, representing **94%** of the 7th CEC production estimate of **874 805 tons**.
- To meet the 7th 2026 CEC estimate, a remaining **51 655 tons** must still be delivered over the next **23 weeks**.
- This implies a required average weekly delivery rate of approximately **2 246 tons** for the remainder of the marketing season.

Sunflowers

- By week 29 of the 2026/27 marketing season, a total of **823 150 tons** have been delivered, after **543 tons** were delivered in the week ending 18th of September 2026.
- Week-on-week deliveries decreased by **279 tons** from **week 26**.
- Overall, sunflower deliveries this season are **101 647 tons** ahead of the *progressive five-year average* and **149 257 tons** ahead of the *progressive 3-year average*.
- The current total deliveries are **132 092 tons** higher than the deliveries made in the same period during the **2025/26 season**, indicating a strong early-season delivery pace.

PROGRESSIVE SEASONAL DELIVERY TRENDS
