18. General conditions

1. Frequency, date of publication and circulation

- SA *Graan/Grain* is published monthly.
- **Date of publication:** We take extra care to ensure that the magazine is posted during the first week of the month. The date is strictly adhered to and simplifies planning in general.
- Circulation is direct and therefore guaranteed.
- Current circulation varies between 18 000 and 18 500. More copies are printed for the March issue (for Grain SA's Congress) and for the April issue (with its focus on Grain SA's NAMPO Harvest Day).

- The address list is adapted and updated monthly and is therefore never outdated.
- SA *Graan/Grain's* address list is divided into postal codes and data regarding the number of producers in a specific area and is therefore always available.

2. Advertisement load (advertisements vs editorial pages)

- SA *Graan/Grain's* general policy is to limit advertisement load to $\pm 35\%$. Full page advertisements are not placed facing each other.

3. Bilingual

- SA *Graan/Grain* is bilingual and articles and advertisements are presented in Afrikaans and English.

4. Content and layout

- A modern typographic layout style – which emphasises the dynamic character of this agricultural magazine – is used. Legibility and visual focus points are therefore emphasised all the time.
- Our readers respond positively to features like the main article – *Grain SA point of view* on pages 4 and 5, *E-posse aan Grootneef, Wiele vir die plaas* that are placed at the back of the magazine.
- SA *Graan/Grain* is divided into specific editorial sections, e.g. Grain SA, the focus of the specific month, on farm level, relevant topics and features.
- Advertisers have the opportunity to present their products and services by means of articles and advertisements to the market.

5. Number of pages in the magazine

- The general number of pages varies between 80, 96 and 148 pages per issue.

6. New developments

The following themes are attended to currently:

- NAMPO Cape
- Grain value chain
- Farm security

SA Graan/Grain now available electronically

SA Graan/Grain moves with the times and readers don't have to wait until their copy of the magazine arrives via the post. SA Graan/Grain is now available as an eBook and can be downloaded from <http://www.grainsa.co.za/sagrain/March2018/>. Please note that this link is only applicable to the March 2018 issue. For other issues the issue's date can be replaced in the example.

7. Focus on

- Research has shown that the loose insert, as presented by the media, doesn't have appeal anymore.
- SA Graan/Grain therefore presents information regarding a specific subject (e.g. seed) in a specific section of the magazine which is known to readers as 'Focus on...'. The issues will also be published during a specific season to make information all the more relevant.

'Focus on...' year planning for 2018	
January	Grain Guide
February	Groundnuts (minifocus); Canola (minifocus)
March	Seed; Weed control on winter grains (minifocus); ARC cultivar recommendations supplement (wheat)
April	NAMPO Harvest Day
May	Money matters and financial services; Weapons and hunting (minifocus)
June	Review of NAMPO Harvest Day; Grain value chain
July	Fertiliser
August	Implements and equipment; Soybeans (minifocus); Sorghum (spotlight); NAMPO Cape
September	Integrated pest control
October	Irrigation; Farm security (minifocus)
November	ARC cultivar recommendations supplement (summer grains); Cover crops (spotlight)
December	General
